*Allowable Subject Matter*

1. The information disclosure statement filed September 26, 2006, fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information lacking a copy referred to therein has not been considered.

2. Claims 1-6 and 8-26 are allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Fenstemaker et al., U.S. Patent No. 6,490,684 B1, and Kaneko, EP 1 031 907 A2.

Fenstemaker et al. discloses:

- a trial management system;
- a storage section storing one or more functions that are to be trial targets;
- a trial instruction giving section (or a user input section) for receiving a user's instruction on a trial for at least one function of the functions;
- a specifying section (or a processing section) for specifying the at least one function, a trial of which is started, according to the instruction received by said trial instruction giving section (or user input section);
- a control section (or a processing section) for setting a trial period for the trial of the function specified by said specifying section in accordance with the instruction received by said trial instruction giving section (or user input section);

- a program tangibly embodied on a computer-readable medium which causes a computer to function as a control section in a trial management system.

Kaneko discloses inputting a password to obtain trial use of computer software.

As per claims 1 and 24-26, the closest prior art of record taken either individually or in combination with other prior art of record fails to teach or suggest wherein, if said control section (or processing section) detects expiration of the trial period for the function during execution of a job thereof, the trial period for the function being set according to the instruction received by said trial instruction giving section (or user input section), then said control section (or processing section) postpones the expiration of the trial period for the function until the time the job of the function is actually completed and if said control section (or processing section) detects expiration of the trial period for the function when no job is being executed, the trial period expires with no postponement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
